VERTICAL INTER FLANGE MODULE 325°

ALM.090.720 Vertical Inter Flange Module 325° allows to move it at a semi-independent angle (320°) from each other by using it at the intersections of two operator arms positioned on the vertical axis. This product, also known as vertical joint, has taken its place among the products as an indispensable module for long-distance, heavily loaded configurations with its rigid structure.
